Story that Inspires...

SEEING OPPORTUNITY IN OBSTACLES

Once there was a king who was curious but wealthy. He decided to test his fellow people to know who has a got a good attitude in life and who would spare some time for the country's progress.
He placed a huge boulder right at the middle of the road and hid in a nearby place to see if anyone would make an attempt to move it off.
He saw some wealthy merchants and courtiers passing by the road. None of them made any attempt to move it off but simply walked away while some others blamed the king for not maintaining roads.

Later, a peasant came the way with a load of vegetables and saw the boulder. He kept his load down and tried to move the boulder away. After strenuous effort, he succeeded in moving it away. He saw a purse lying in the place of the boulder.

It contained many gold coins and a note from the king which read 'this is the reward for the person who moves the boulder away'.
Moral: It is quite common for people to run away from problems and obstacles. But the story clearly shows the importance of seeing an opportunity in every obstacle which might improve our condition. Invest some time to remove obstacles on your way and experience many unseen presences.

A Book's Journey: From Words to Wonder

Paluk Pathania
Editor

Somewhere between the first word and the final page, a book passes through many hands. What we don't see is everything that happens along the way.

A book does not simply appear on a shelf. It begins as an idea waiting to take shape. Words are written, ideas are explored, and pages slowly begin to come together. But a story on paper is only the beginning. It needs to be read, questioned, and looked at from different perspectives before it can become what it is meant to be.

A story is rarely perfect in its first form. Some words change, some ideas move, some pages disappear, and sometimes a small suggestion can make a big difference. With every change, the story becomes a little clearer and a little stronger. Slowly, what was once a draft starts becoming a book we can imagine holding in our hands.

Then the words meet pictures. A character that lived only in our imagination gets a face. A place gets its colours. A moment we had only read about suddenly becomes something we can see. Especially in a children's book, the pictures become a part of the story too, giving the reader another way to enter its world. Then comes the moment when all these pieces need to come together. Words, pictures, colours, and pages are brought into one place, each making room for the other. A picture may need more space, a sentence may need to move, or a page may need to be rearranged. Slowly, the separate pieces begin to feel like one complete book.

Even then, it is not quite ready. There are careful eyes that go through every page, small details to check, and a final process that turns everything on a screen into something real. From there, the book begins to make its way into the world—to bookstores, libraries, schools, homes, and eventually, to the person it has been waiting for: the reader. And that is what makes a book so special.

By the time it reaches us, it is no longer just words and pictures on a page. It carries the time, thought, and care that went into shaping it—the conversations, the changes, the questions, and all the little decisions that brought it together.

We may only see the finished book, but there is so much behind those pages that we may never notice. A sentence changed, a picture adjusted, a page moved, an idea reconsidered. None of these things may stand out on their own, but together, they are what make the book what it is. And then, after all that work, something beautiful happens. The book leaves the hands that made it and finds its way into someone else's.

A story that was once being shaped on a page becomes a bedtime favourite, a classroom companion, a gift between friends, or a quiet moment shared with oneself. That is when a book truly comes alive.

So the next time you hold a book, remember that you are not just holding a story. You are holding everything it took to bring that story to you.
